

# Wi-Fi Upgrade Update

Updated June 21, 2022

If you have been following our online updates, then you know that we are working on installing a new Wi-Fi system that our guests deserve! It hasn't been easy and what should have been a completed project by now has been delayed...more than once.

Like everything else, there have been shortages and delays beyond our control, pushing this project back much further than we anticipated. Here we are at the beginning of our busy season when our guests will be most affected by this delay.

We thank you for being patient with us and the company we hired to get the job done. Soon guests will see new Wi-Fi poles being installed throughout the resort. Although this may cause some noise and possible interruptions in your relaxing RV experience, it will be so worth it in the end!

You must know that until this project is complete, we will not be able to guarantee the Wi-Fi. If this is an issue that will require you to cancel your stay, please contact us as soon as possible.

Again, thank you so much for your continued support through the installation phase of this upgrade. We believe that our guests will be satisfied with the new system upon completion.

*AccessParks is an internet service provider specializing in national and state parks. They enable true broadband speeds to every user device in some of the most challenging terrains on earth. Please be patient with us as we get through the installation phase of this upgrade.*
